ENTITY VERIFICATION ③

- ☑ Registration documents match the public registry — View document ›
- ☐ Registered address verified (document under 3 months) — View document ›
- ☑ Directors and signatories match the board resolution — View 2 documents ›

PEOPLE

- ☑ UBO identity verified (T. P.) — View document ›
- ☐ UBO address verified (T. P.) — View document ›
- ☐ Source of funds explained (M. K.) — No document yet

SCREENING

- ☑ Sanctions and PEP screening clear — no document needed
- ☐ Adverse media reviewed — no document needed

① **Row actions.** Shown when `documents[].has_file = true`. **Open** streams `GET /kyc/cases/{org_id}/documents/{ref}/content`; **Download** adds `?disposition=attachment`. Columns map to `doc_type`, `ref`, `person_masked`, `status`, `mime` · `page_count` · `size_bytes`, `uploaded_at`.

② **Disabled actions.** `mime` outside `image/jpeg|png` or `application/pdf` → Open disabled, tooltip "This file type can't be previewed. Download it to view." `has_file = false` → both disabled, tooltip "No file uploaded yet".

③ **View document.** Rendered when `checklist[].evidence_refs` is non-empty; opens the same viewer on the first ref (or a picker of refs when there are several). Empty refs with a required doc type → muted "No document yet". Items with no evidence type show "no document needed".

· Masking: people show as `person_masked` ("T. P."); wallets shortened, full address in the tooltip.

④ **Header.** `doc_type` · `ref` · `status`. Esc and ✕ close; focus returns to the row's Open button.

⑤ **Used as evidence for.** Checklist items whose `evidence_refs` include this ref. Ticking calls the same `kyc.checklist.tick` as the case page, so the officer can tick while looking at the file.

⑥ **Toolbar.** Page nav uses `page_count`; thumbnails on the left for multi-page PDFs. Zoom 50–300%, Fit width, Rotate. Images get zoom + rotate only.

⑦ **Logging.** The content request writes audit event `kyc.document.opened` (actor, org_id, ref); Download writes `kyc.document.downloaded`. Download counts toward the hourly limit (see 429).

⑧ **Opened from the checklist.** The viewer receives `checklist_item_id`; that item is pinned with its guidance text and a **Tick item** button (`kyc.checklist.tick`). When the item has several `evidence_refs`, "Next: D-0046 ›" steps through them without closing.

· Person data uses `person_masked` unless the case is in reveal mode (10-minute window started on the case page).

Progress from bytes received ÷ `size_bytes`. Controls stay disabled until the first page renders.

Error `5xx · network · stream aborted`

Couldn't open the document

The file didn't load. Check your connection and try again.

Retry

`request id 7f3a…c21e`

Retry re-requests the content. The request id is shown so ops can find it in the logs.

Limit reached — `429 · Retry-After: 1380`

Download limit reached for this hour

Try again in 23 min.

Retry in 23:00

Minutes from `Retry-After` (seconds, rounded up). The countdown re-enables Retry; Download buttons in the table show the same tooltip until then.

Unsupported or missing file — `415 UNSUPPORTED_MEDIA · 404 FILE_MISSING`

This file can't be previewed

DOCX files open outside the PMS.

File not found

The record exists but the file is missing from storage. Ask the client to upload it again.

Request again

415 is normally caught before opening (Open disabled in the table); the panel covers a mime mismatch found while streaming. 404 FILE_MISSING also flags the row with a red "file missing" tag.
